Description of Proposal: Northwest Innovation Works, LLC - Kalama (NWIW) proposes to develop and operate a natural gas-to-methanol production plant and storage facilities on approximately 90 acres in the Port of Kalama (Port). The project objective is the manufacture and shipment of methanol to global markets for use as a feedstock for manufacturing olefins used in the production of plastics and other materials. Natural gas will be delivered to the methanol plant via a proposed new transmission pipeline lateral. Northwest Pipeline GP will be responsible for obtaining permits for and constructing this pipeline, extending from its existing pipeline approximately three miles through unincorporated Cowlitz County and the City of Kalama. Methanol will be transferred by pipeline across Port property from the storage area to a deep draft marine terminal on the Columbia River including a new dock and new berth created by dredging.

Location of the Proposal: The project would be located on land leased from the Port. The site is located on the Columbia River in unincorporated Cowlitz County. It is accessible from Tradewinds Road, a private Port road.
